Canadian Citizen | Fluent in French and English | Based in Montreal

SUMMARY

Computer Science student (BSc, graduating December 2026) with over two years of substantial personal and academic front-end work. Built and shipped a full stack Next.js, React and TypeScript product with real users, payments and data dashboards, and owns features end to end: requirements, implementation, testing with Jest and delivery through CI/CD. Fluent in English and French.

TECHNICAL SKILLS

Front End: React, Next.js (SSR), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, responsive layouts, Vue.js, Chart.js data dashboards, mobile-friendly web apps, UI/UX design

APIs and Data: Consuming REST APIs (async handling), JSON, Node.js (Express), PostgreSQL, Supabase, Stripe payments and webhooks, Google OAuth

Testing: Jest, Playwright, PyTest, Cucumber (BDD acceptance tests)

Workflow and DevOps: Git (branches, pull requests, code reviews), GitHub, Azure DevOps, CI/CD (GitHub Actions, PowerShell), Docker, Kubernetes, AWS, Azure

AI-Assisted Development: Claude Code, Codex, CLAUDE.md, Claude API, verifying agent output

Languages Spoken: English (fluent), French (fluent), Sign Language (intermediate)

PROJECTS

The Art of Consistency | SaaS with real users, theartofconsistency.app *Solo Founder & Developer*

- Built and shipped a bilingual product end to end with Next.js, React and TypeScript on a Node.js and PostgreSQL backend, with Google OAuth and Stripe payments and webhooks (fintech-style monetization flow).
- Built data dashboards with Chart.js so users see their progress at a glance; front end consumes the backend through REST APIs with async handling.
- Led a UI modernization from real user feedback: found that UI inconsistencies caused poor experiences, then fixed them and simplified screens to make the product less intimidating. Migrated it from Blueprint, a React mobile app, to Next.js; Jest tests and CI/CD.

touchgrass | Mobile-first web app, chris-robby.github.io/touchgrass *TypeScript*

- Built a TypeScript web app that retrieves free activities in Montreal from the web every morning, with a swipe-style discovery interface, home-screen support on phones and bilingual content.

Digital Library for a Choir | Real project, 30+ members *Vue.js, Supabase, REST APIs*

- Built the member view and an admin spreadsheet-style overview in Vue.js on top of independently deployed services communicating over REST; used by 30+ members, saving time and improving consistency.

Banking Web Application | Full stack *React, Java, Spring Boot*

- Built a React front end consuming a Spring Boot REST API (CRUD, validation, exception handling, database integration) with unit and integration tests.

Cloud-Native Microservices Platform | CI/CD and deployment *Docker, Kubernetes, GitHub Actions*

- Containerized services, deployed them to Google Kubernetes Engine and Red Hat OpenShift, and automated builds and deployments with GitHub Actions and Google Artifact Registry.

EXPERIENCE

Freelance UI Developer | Chrisland Engineering *Riipen project*

- Turned the company's needs into UI/UX screens for its application, built in JavaScript, through a freelance project on Riipen.

Supervisor | Metro *Sept 2025 to Present*

- Coordinate the team, solve problems in real time, and keep colleagues and customers informed with clear communication.

EDUCATION

Concordia University, Montreal, QC | BSc, Computer Science *Jan 2024 to Expected Dec 2026*

Coursework: Data Structures & Algorithms (A+), Web Development, SOEN 357 User Interface Design (in progress), Software Engineering, Databases, Introduction to Artificial Intelligence
